Education

University of Waterloo

Computational Mathematics – 3.93 GPA

Waterloo, ON

Sep 2024 - Jan 2029

- **Coursework:** Algorithm Design and Data Abstraction, Tools and Techniques for Software Development

Experience

Software Engineering Intern

Inductive Solution

Boston, MA

Jan 2026 - Present

- Shipped **Stripe billing** across **Node/Prisma** backend and web/iOS/Android UI: webhook handler with **TOCTOU race fix** (catch P2002, retry existing row), credit-based pricing, and **Flyway** migration.
- Rebuilt mobile push notifications: migrated iOS from **NSE rich notifications** to **Expo Push Service**, hardened the **Signal gateway** with timeouts and 5xx retry, and added tap-to-open foreground banners.
- Eliminated a shared **Matrix admin token** shipped in client bundles by architecting a **server-side login proxy** with per-user credentials across mobile, web, **Node/Prisma** backend, and a Flyway migration.

Tech Content Creator

@jeffguo.md [🔗](#)

Oct 2025 - Present

- Identified untapped content niche in tech song parodies, validated through rapid shipping, and iterated on format. pivoted from faceless to on-camera after analyzing performance, scaling to **4.6M+** views and **200k+** shares on Instagram
- Grew to **2,000+** followers in **30 days** by systematically testing hooks, formats, and posting strategies.

Digital Marketing & SEO Intern

Opusense (YC X25)

Toronto, ON

May 2025 - Aug 2025

- Built **SEO/GEO** content strategy improving click-through rate by **50%**, and QA'd mobile builds with the dev team.

Projects

The Boards [Shared Leaderboard iOS App]: React Native, Expo, Supabase

[the-boards](#) [🔗](#)

- Shipped to the **App Store** with **100+ users**; built real-time leaderboards, social features, and push notifications end-to-end from MVP through Apple review to release.
- Built real-time sync and notification infrastructure with **Supabase Realtime** and **Expo Notifications**, handling concurrent score updates across group competitions.

Insu [Automated Insulin Management iOS App]: Swift, CoreBluetooth, RileyLink

[Insu](#) [🔗](#)

- Integrated with **continuous glucose monitors** and **insulin pumps** over a **RileyLink** Bluetooth bridge, relaying live sensor data and delivering automated bolus commands from iOS under medical-grade reliability constraints.
- Led a team of **4 engineers** to build an iOS app for Type 1 diabetes management in **Swift** and **CoreBluetooth**, with live device communication and pump state reconciliation.
- Built an AI food recognition feature analyzing meal photos to estimate carbs and suggest bolus amounts.

IMitate [Medical Patient Simulator]: Next.js, Supabase, Gemini API

[IMitate](#) [🔗](#)

- Developed a medical education platform using **Next.js** to provide free patient simulation and diagnostic assessment for IM students, reducing the cost and barriers of otherwise costly traditional mock simulations.
- Created a patient database and user authentication system with **Supabase**, storing **200+** unique patients, each with varying illnesses and personalities to enable realistic case scenarios and diverse clinical interactions.
- Used **Gemini API** to simulate patients, and to run diagnostic assessments based on IM principles.

SHOUT [AI Concert Removal iOS App]: Swift, Audioshake

[SHOUT](#) [🔗](#)

- Developed an iOS app for removing vocals from concert videos, achieving **50+** user waitlist signups.
- Built custom **Vercel serverless backend** to proxy **AudioShake's multi-speaker separation API**.
- Used **Swift/SwiftUI** and **AVFoundation** to create seamless audio/video processing workflow with stem selection interface, real-time preview functionality, and waveform visualization for voice identification.

Skills

- **Languages:** TypeScript, JavaScript, Python, Swift, SQL, Bash
- **Frontend & Mobile:** React, Next.js, React Native, Expo, SwiftUI, Tailwind CSS
- **Backend & Data:** Node.js, Express, FastAPI, Prisma, PostgreSQL, MySQL, MongoDB, Redis, Supabase, Firebase
- **Cloud, Tools & APIs:** Docker, AWS, Vercel, Git, CI/CD, Linux, Jest, Playwright, Stripe, OpenAI, Gemini
